Hi there, this is the simple database challenge developed by Zejun. Please follow the following steps to compile the file.

Step 1. Unzip the file to a folder.

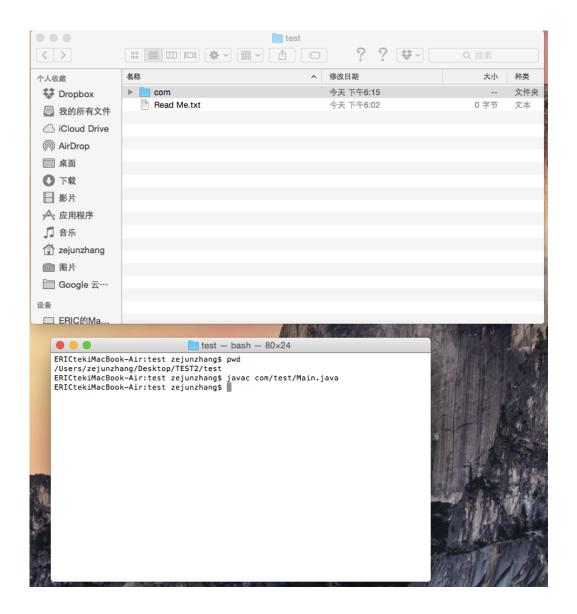

Step 2. Go to the folder showed as below, make sure that your under test folder and could see com folder directly.

Step 3. Use following command to compile the file

javac com/test/Main.java

After you finished this you should see some .class file in the folder.

Step 4. Run the program with following command

java com/test/Main

```
test - bash - 80×24
ERICtekiMacBook-Air:test zejunzhang$ pwd
/Users/zejunzhang/Desktop/TEST2/test
ERICtekiMacBook-Air:test zejunzhang$ javac com/test/Main.java
ERICtekiMacBook-Air:test zejunzhang$ java com/test/Main
